death

27 July 2017

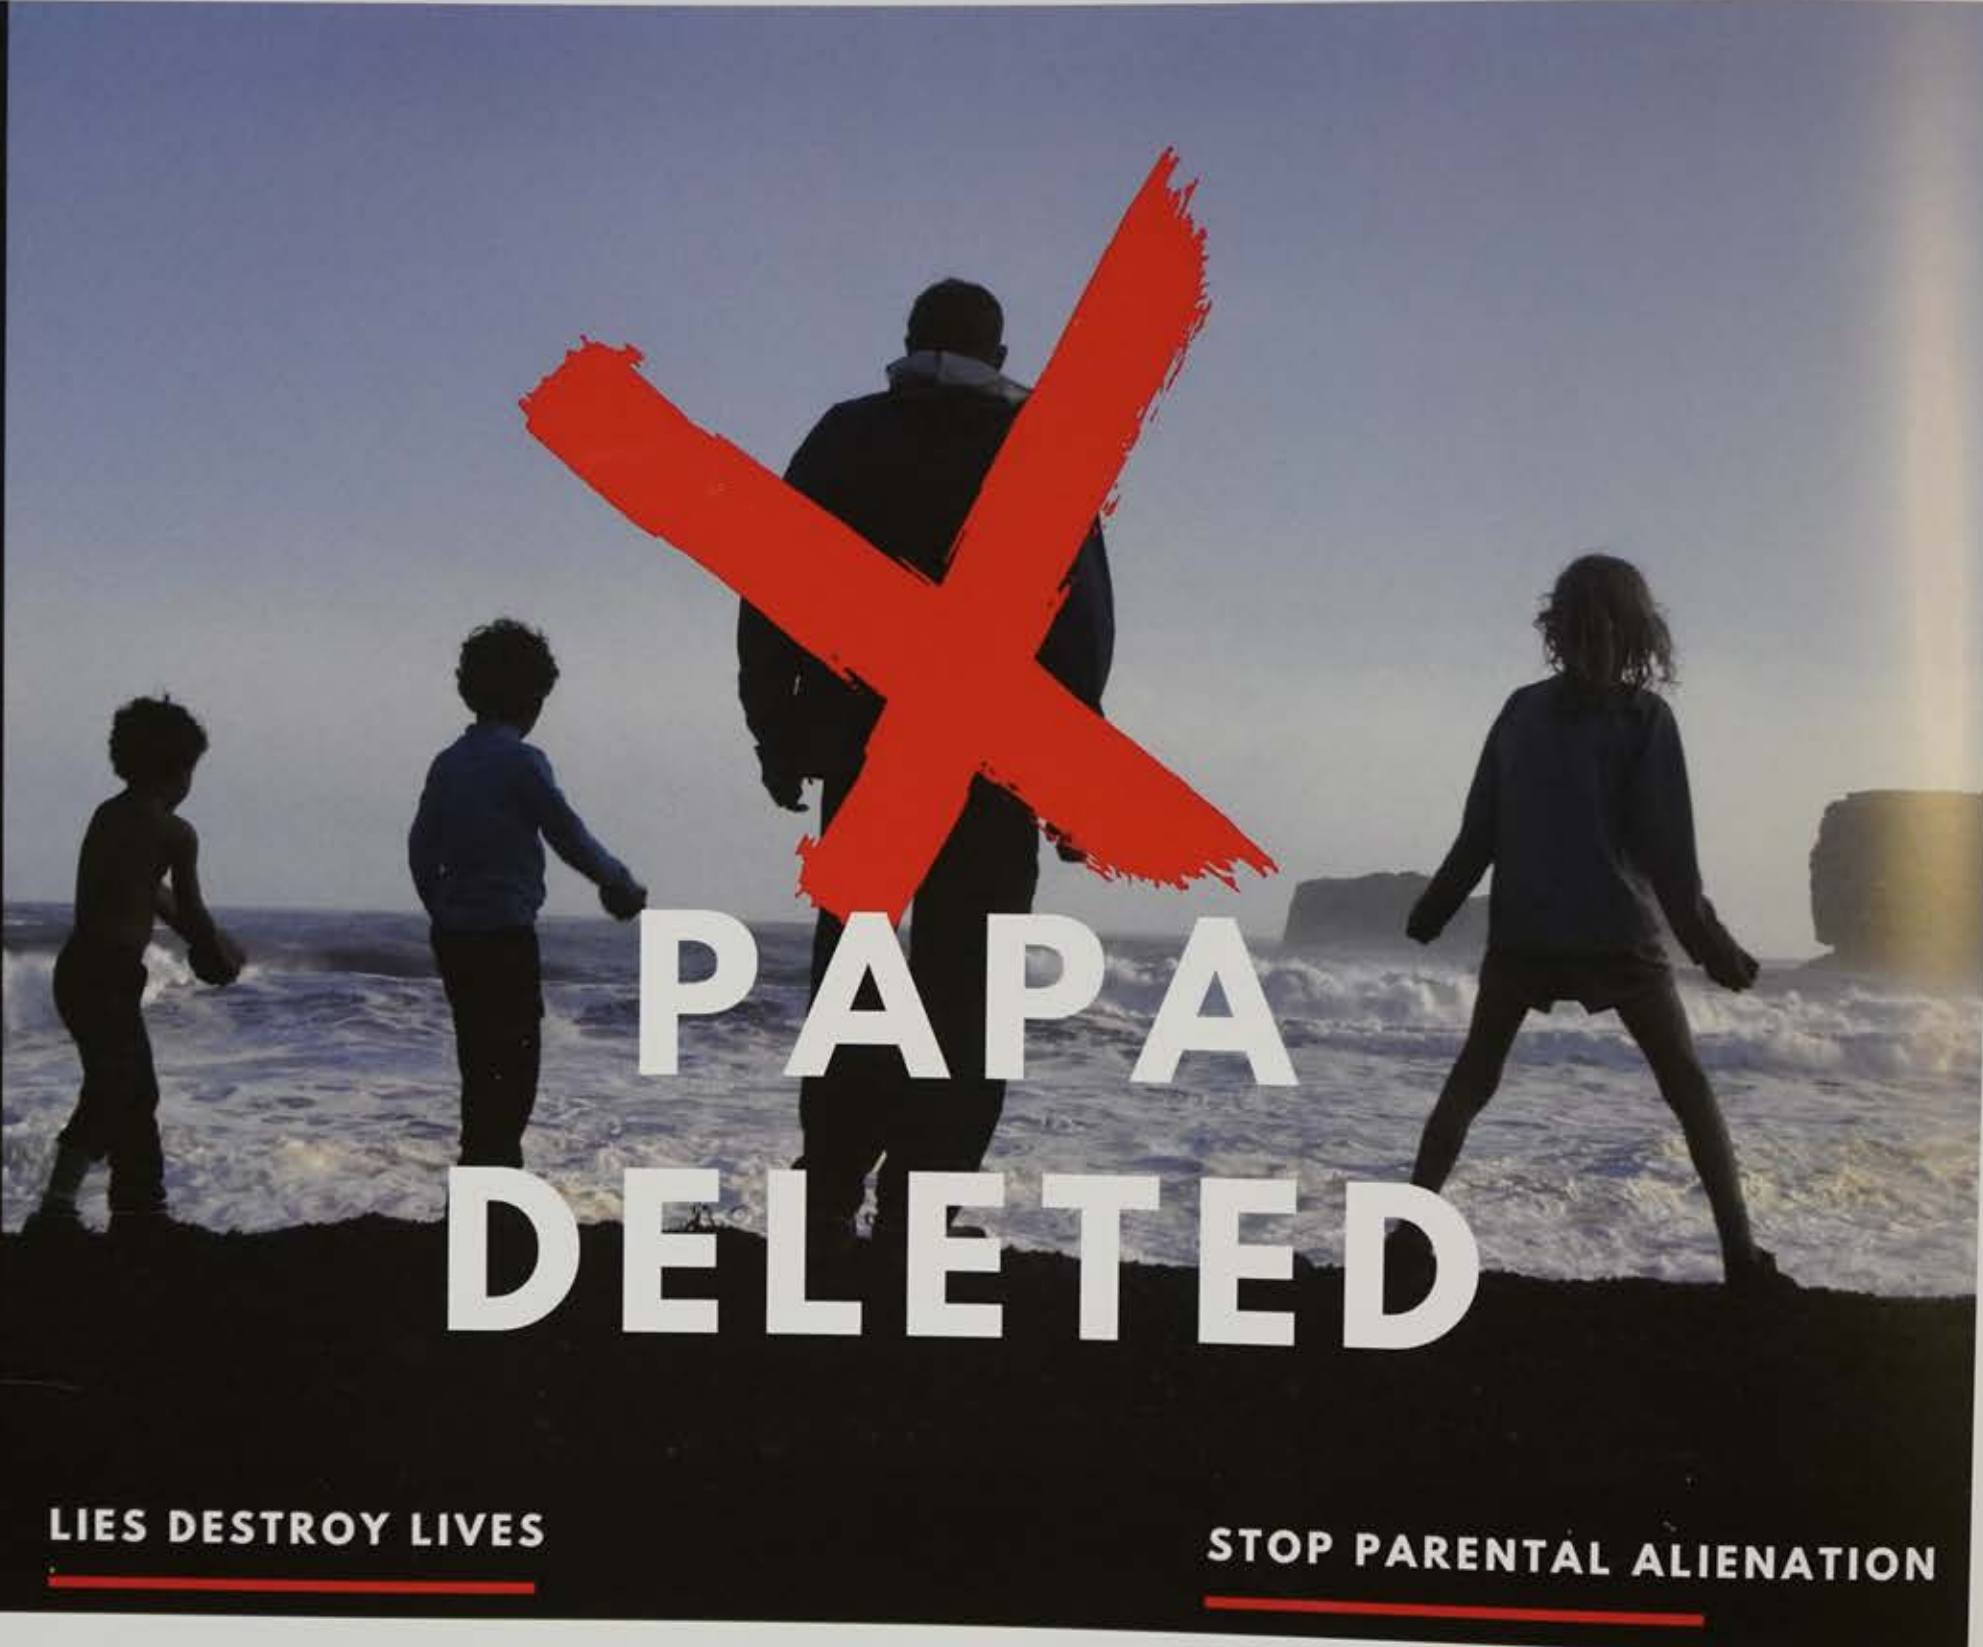

On this day Lise-Anne has a paranoid mental breakdown. Only years later do we understand that she suffers from Bi-polar disorder (agrophobia). But is too late...

She destroys the family, the life in the moutnains, the farm in Lyle, and destroys their childhood completely. The family is hostage to her disease.

Parental Alienation is Child Abuse. She wants to silence the past 20 years, so that the boys will not know the nest of Lies and Deceptions they live in today.

According to renowned psychologist Dr. Gardner, "Parental Aiienation is worse than death" for children who suffered from a predator, alienating parent. His statement comes from clinical interviews of grown-up adults who suffered as children.
